

Oh Non-Muslims!!!

"Pardon us, forgive us, and please don't look at us. We are sick people; we inherited a lot of sickness, not from Islam but from our background, our culture, our habits, and from being far away from our own belief."

"What you see and what you heard about Islam and Muslims is far away from the truth. This is because the majority of Muslims today aren't in a state of Islam, they aren't in the state of embracing their own faith."

It is also due to the mixing of religion, politics, power struggles, and fighting between seen and unseen forces with different agendas to corrupt the message- by both Muslims and Non-Muslims, either intentionally unintentionally.

What's your duty?

Your duty toward yourself is to first-of-all **seek the knowledge of the message**, the messenger and the revelation and to mask your eyes from what are called "Muslim do's and don'ts."

We have the final revelation and it is your job to seek the truth. Call The Almighty, the Creator, and ask Him to guide you to the truth.

"It's your soul, your journey of salvation, your happiness and your success in this life and the hereafter."

"You owe it yourself. You struggle for money, you struggle for daily pleasure, you make a lot of effort to study about your diet, your weight, your nails, your hair, and your shoes."

"But, how much do you struggle? How much do you seek? How much effort do you make for your own faith and for your own salvation?"

This message is the message of the truth and the message of honesty. If you think not, then ask yourself why.

"Do I care about my life? Do I care about my death and my life after death? Do I care about my soul?"

If you're interested, please go to my library and try to spend some time watching the video "Q&A: Where are We Going?" or "Food and Thought for the Soul." (Both found in the first Video Series, "From Darkness to Light")

Raise your hands to the sky, **call the Creator**, take sometime off and digest what you have been

receiving.

Remember: Today you have time, tomorrow you don't. Today you have a chance, tomorrow you don't. Be merciful to yourself, you owe yourself.

Four Questions You Should Answer:

1. Who am I?

2. Where am I?

3. Where am I going?

4. What's my goal and destination in life?

"Hurricanes, Earthquakes, Volcanoes, Diseases, Mischief, Killing!!! Where are we going?"

I promise you: if you engage with us, **we will lead you to the happiness of this life and the hereafter**, by the will of the Almighty Allah (SWT), the Creator, the Light, the Most Wise, and the Guider.

"Now at this time in your life, you need Allah. When you enter your grave, you need Allah. And on the Day of Judgment, you will need Allah."

Come talk to us and listen to the call of light. Get

engaged, ask questions. Hear what we talking about, maybe you will benefit. **You will never lose!** We promise that you will gain something by the will of The Creator.

"Our services are for free, we get paid by the Almighty, the Most Generous One. We believe in Allah, the Provider, and we seek support only by Him."

We call towards Him, we live for Him and we ask Him to accept our effort sincerely with truthfulness for Him. Ameen! Ameen! Ameen! Ya Rabbil-al-Ameen.
